Dragon Professional

We're always happy to shine a light on a Dragon

I always like to hear from organizations that use Dragon, and learn how it helps them be more productive, more efficient, and even to work in new ways. I also enjoy it when we take Dragon out to events and show professionals what it can do for them. Recently we've been talking to legal professionals, and hearing from Dragon users in the legal field. Legal professionals spend a great deal of time creating documents, working with case management systems and handling emails. Dragon can really help them with efficiency, and we don't just say this without any evidence – it's what legal professionals say to us.

Nothing makes me quite as happy as hearing from a Dragon user. I know how it can change the work day for the better, because I often talk to people who benefit. But still, there is nothing quite like that thrill of hearing people talk about the benefits in their own words.

Recently we spent time at the British Legal Technical Forum, an event which brings legal professionals together to learn about a whole range of technologies that can help them in their everyday work. We talked about our new Dragon Professional Anywhere, which provides speech to text and voice control across a whole range of different applications, including specialist legal case management systems. We gave demos at our booth. And we talked about Dragon Anywhere Mobile, the smartphone dictation solution that seamlessly integrates with Dragon Professional Anywhere to give an additional boost to the power of your voice.

It's always good to be able to give real world examples of where Dragon has made a difference. How about this for an endorsement –

“Dragon s accuracy was excellent straight away. Our team were able to create their own documentation, write-ups and notes rather than passing them onto our already pressured secretarial staff.”

That's a quote from David Birks, Director at Newtons, a legal firm that employs over 100 professionals across Yorkshire, Teesside and County Durham and has offices in Harrogate, York, Knaresborough, Darlington, Durham, Ripon, Richmond, Stokesley, Thirsk and Wakefield.

Newtons has been a user of Nuance solutions including Dragon for some years, but still, our latest Dragon Professional Anywhere brings fresh productivity gains. You can find out more about Newtons' experiences [here](#).

If you want to learn more about Dragon Professional Anywhere then check out our [video](#), and if you'd like us to follow up with you, organize a demo, or answer any specific questions you might have, just [get in touch](#).
