## Taking charge of community health: The power of rural hospitals

One in five Americans – approximately 57 million — live in rural communities. Today, on National Rural Health Day, we commend the dedicated medical professionals who care for them and the organizations that make it possible.

**Robert Budman, MD**

Posted November 19, 2020

The logistics and realities rural hospitals face have unique complexities vs. organizations in metropolitan or urban settings. The challenges of rising costs, new regulations, changing

reimbursement models, clinician burnout, and staffing shortages are intensified in the rural community. Rural hospital risk compounded with the COVID-19 pandemic and surges . And yet, most rural health organizations achieve better patient satisfaction and outcomes as compared to their non-rural peers while charging less.\*

We are proud at [Nuance Healthcare](#) to play a part in that success. Our clinical documentation solutions help care teams efficiently use their time and resources by offering a more natural way to capture the patient story.

We delight in these achievements:

- Northeastern Health System in Oklahoma successfully [reduced document deficiency rate](#) from over 25% to 2% with Dragon Medical One.
- Palo Pinto General Hospital in Mineral Wells, TX [significantly streamlined core measure reporting and analysis](#).
- Concord Hospital in Concord, NH [reduced nursing documentation time by 65%](#) and improved triage call note quality

Our goal is to empower providers and staff with tools that drive productivity and provide resources appropriate for the setting and worth the investment. We are privileged to help rural facilities enhance the lives of caregivers and patients alike.

Thank you for all you do and enjoy the well-deserved recognition!

#PowerofRural
