

Life at Nuance, Volunteer program

6 Nuance employees share their perspectives on volunteering

[Life at Nuance](#)

April 20, 2022

Choosing to volunteer and support a cause you are passionate about not only enriches your life, but also impact others. When members of #TeamNuance volunteer, they embrace our Nuance Values and connect with friends, new people, and colleagues, to 'stay curious' and learn something new while also making a difference.

Andiana Aponte joined Nuance in 2017 and works as a Talent and Organizational Development Specialist. She is passionate about learning, diversity and inclusion, as well as helping her peers. Her DEI efforts are showcased via leading two of Nuance's employee resource groups, as Chair of the Multicultural Network, and Co-Chair of the Women in Nuance Network. She graduated from Northeastern University with a BS in Psychology. Outside of work, she enjoys spending time with family, reading, and spoiling her dog.

Over the past two years, we've all faced challenges to change so many things about how we live our everyday lives – how we gather with friends and family, how we carry out chores and errands, and how we work. Despite all this, at Nuance, our employees have continued to exemplify our values, especially by “using their powers for good.” One way we have seen this is in the willingness of so many to continue to give back to their communities through volunteerism – getting creative, when necessary, but still giving their time and energy to causes that matter most to them. Nuance Cares, our Corporate Social Responsibility program, empowers us all to give back to various causes and communities by providing employees with 16 hours of Volunteer Time Off (VTO) per year to help make finding the time to do these

things even easier.

In celebration of National Volunteer Month in April, read on to hear from a few of our employees as they share their thoughts around why volunteerism is important to them and join us in honoring the significant impact all volunteers have on our communities across the globe.

sharing will enrich everyone with more knowledge! And knowledge is power as it creates opportunities, success, helps people to solve problems, and even improves health!"

Dawn Cox | USA

"Volunteering, to me, is a way I can make the world a better place by giving

back to those who are less fortunate than myself. Sometimes this means spending an hour at the animal shelter loving on unwanted animals and other times it means gutting a building in a rough part of town, so that their church can turn it into a children's mini

Rocio Armas | Spain

“The hours I spend volunteering are always quality time for me. It’s a way to pay forward and to try to make a change for the better, no matter how small. Through my time volunteering, I’ve learned a lot – greater empathy and awareness being the two main things I gain with
